## PROFILE

I'm an experienced full stack developer with over 20 successful projects under my belt, specializing in web applications. I also have a strong background in IT technical support, excelling in computer repair and troubleshooting hardware and software issues. I'm skilled in executing IoT projects for both home and industrial settings.
In addition to development and support, I'm well-versed in networking, including LAN, WLAN, MAN, and server management, ensuring reliable and secure network systems. I'm passionate about technology, always looking to improve my skills and take on exciting new projects.

## WORK EXPERIENCE
